The next diligence call

CUSTOMER HYPOTHESIS

Emerging venture funds and angel investors

An investor has a market thesis.
The hard choice is where to spend
the next hour of diligence.

Which company benefits now?

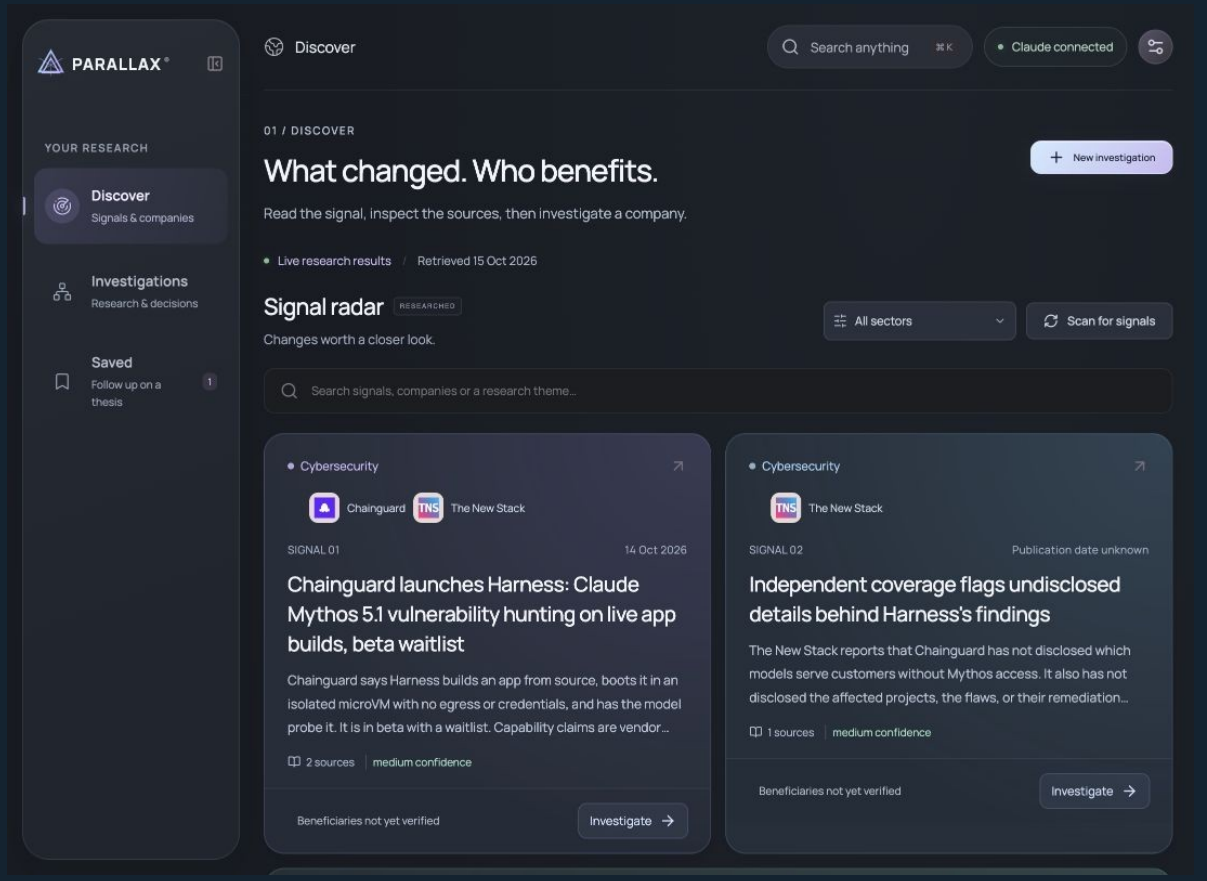

What evidence could change our minds?

A ranked shortlist for each theme

Niche private companies, with a reason to care now

A dated financing valuation
The commercial hypothesis
The strongest objection
The next proof to collect

Default preference
$100M or below

Historical financing marks. Up to five qualify. Investment access and current entry terms need separate diligence.

Conviction Universe

What survives without company claims?

The evidence map shows companies across the investor’s themes.
A reversible lens removes company claims.

CLOSER TO THE CORE

More cited evidence records supported

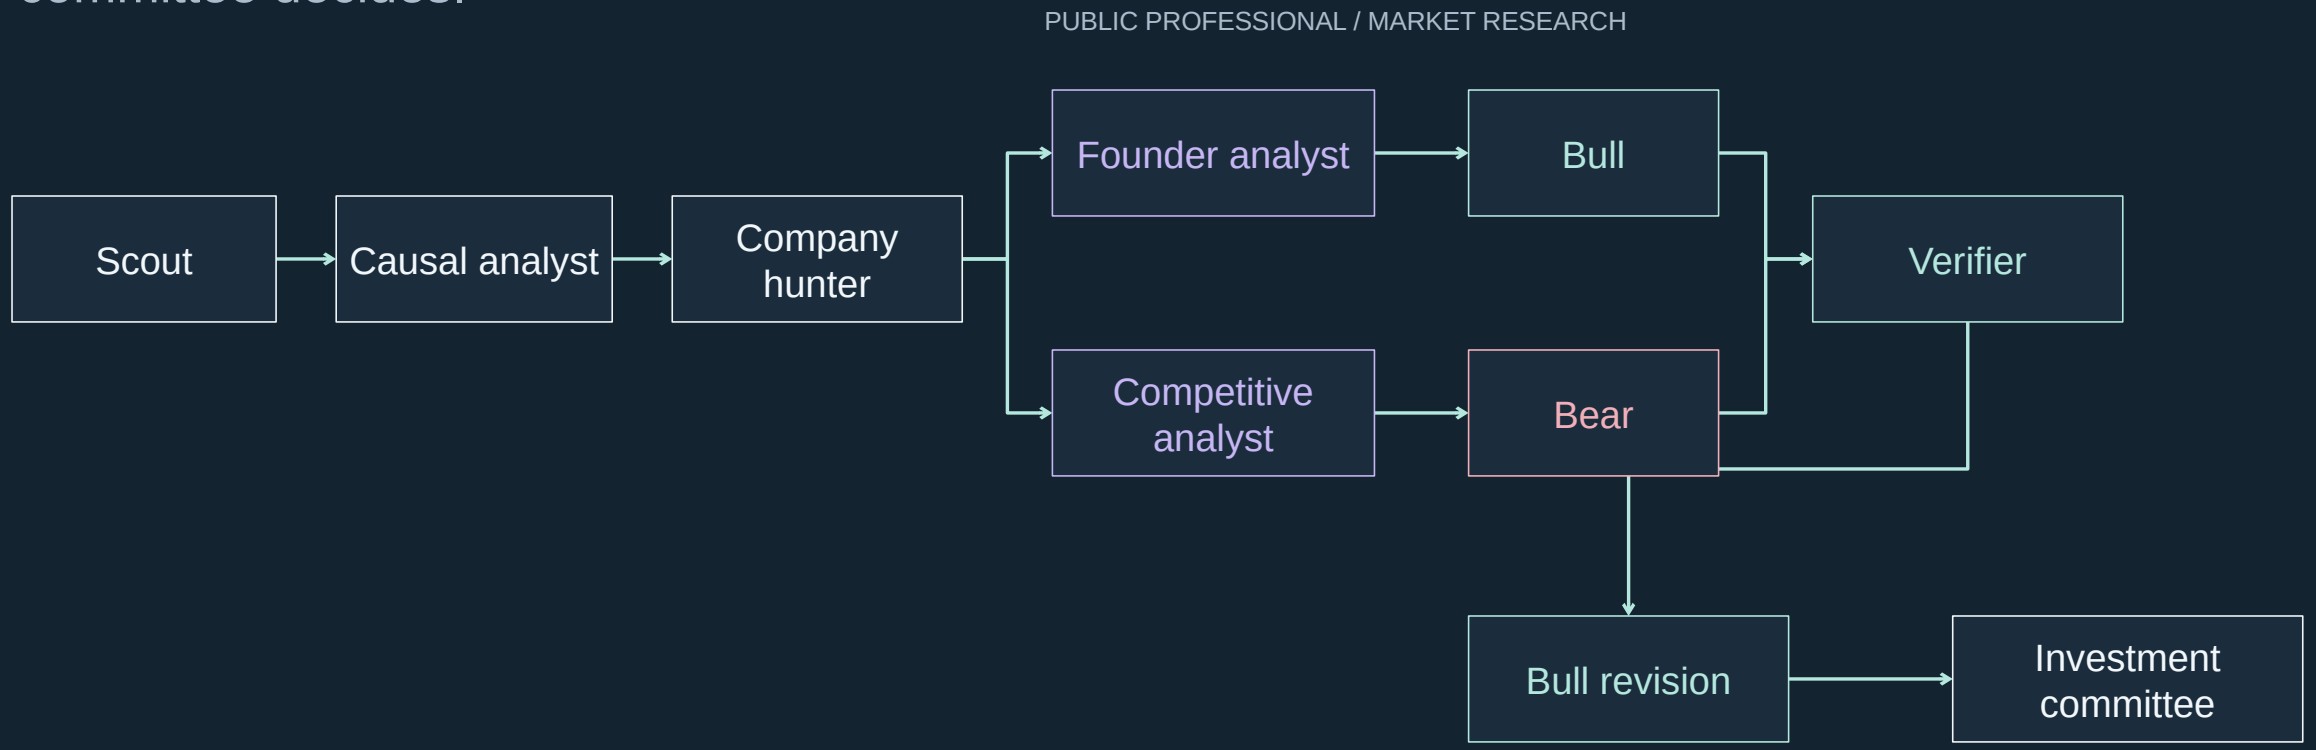

HIGHER POSITION

Greater agent confidence

A scenario based on admitted evidence. Position does not predict investment returns.

Nine agents with a feedback loop

Specialists hand off findings and citations. A fresh verifier challenges the thesis before the committee decides.

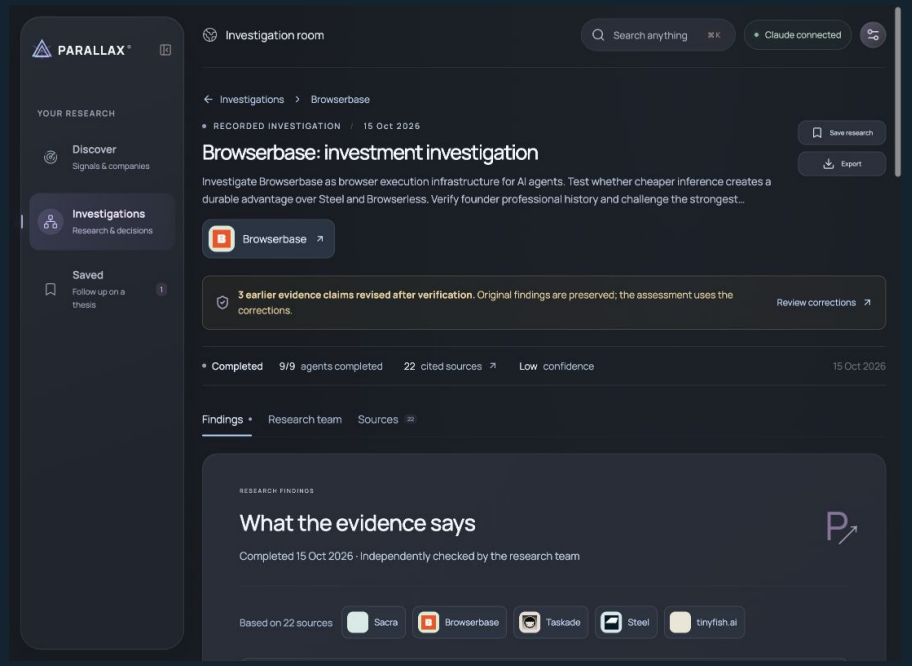

Persisted evidence and bounded budgets support long runs, interruption recovery and an inspectable history.

A real correction changed the thesis

RECORDED BROWSERBASE INVESTIGATION

Salesforce and Visa

The cited article named them under competitor Sauce Labs. Verification withdrew the Browserbase attribution.

MONITOR

Low research confidence

9 agent roles 28 evidence records 22 source URLs

Evidence rules before a ranking

01 **Company, financing amount and date**

A funding amount or SAFE cap cannot substitute for a priced valuation.

02 **Only admitted research URLs**

Source corrections retain the original audit trail.

03 **Unknowns stay visible**

Unpriced companies remain outside the ranked list.

04 **A bounded research process**

Public professional records, server-side keys and explicit partial results.

Publisher investment hit rates remain unmeasured. A citation can still be misread.

The pilot proposal

PROPOSED PRICING

$299

per analyst / month

Team plan with shared themes and research usage limits

Five pilot funds

Test one real investment theme with your own diligence questions.

Measure the decision: time spent, source coverage and whether a challenge changes the priority order.

Pricing and demand are hypotheses. No verified customers or revenue claimed.
